

# 2 ½ GALLON PEN WATERER

Trojan's new "PEN WATERER" -- with Model 75 Nipple

A portable, durable water source.

- Perfect for use in pens and is easy to use. To drink, the animals simply bite down, or move the stainless steel trigger in the center of the nipple to activate the water flow, when the animal releases the trigger the water flow stops.
- Use them to water, pigs, goats, sheep, dogs, cats and rabbits.
- Use them in pens where you need water in Summer.
- Use them to medicate your animals.
- Use them wherever you need a portable, durable water source.
- Constructed of high impact plastic, these Waterers resist rust and corrosion. The unit holds approximately 2 and a half a gallon of water and includes our time-tested drinking nipple.
- They are easy to mount, move, fill, drain, clean and store. Screw on top cap for easy filling without having to remove from mounted position.
- Great for travel since motion and jarring will not activate the water valve.
- They are easy to attach on a fence or pen and can be easily adjusted for the drinking height needed for your animal.
